

# Daniel Chizurukeme

Highly motivated and results-driven Full Stack Web Developer with 2 years of experience primarily in freelance projects. Proven ability to deliver high-quality, scalable, and user-friendly web applications from concept to deployment.

## Relevant Experience

Senior Engineer, **Metacap Technology** Sept 2023 – Present

- Contribute to the development of responsive websites and web applications, implementing features based on client requirements and design specifications.
- Resolve bugs and performed routine maintenance to ensure optimal functionality of web products.
- Conduct rigorous testing and debugging to ensure cross-browser compatibility and smooth user experiences.
- Actively enhance technical skills by learning new frameworks and technologies to improve project contributions.
- Assist senior developers in project execution and supported cross functional teams in achieving project milestones.

### Mobo Marts (Freelance Project)

Dates: Ongoing

Description: Developed a comprehensive e-commerce platform from scratch, showcasing advanced full-stack development skills using cutting-edge technologies. This project served as an extensive learning experience and a portfolio piece demonstrating the ability to build real-world applications.

- Designed and developed the entire application architecture.
- Implemented database models and migrations using Prisma.
- Built secure authentication and authorization systems.
- Integrated payment gateways and managed transaction processing.
- Developed front-end components and user interfaces using React and ShadCN UI component library.
- Implemented form validation and error handling.
- Wrote unit tests to ensure code quality and reliability.
- Utilized Next.js server actions for backend logic.

### Property Pro (Personal Project)

Dates: Ongoing

Description: Developed a full-featured, server-side rendered property rental website from the ground up, demonstrating proficiency in modern web development practices and full-stack architecture. This project showcases the ability to build complex, interactive web applications.

- Designed and developed the entire application architecture.
- Implemented database models and interactions using MongoDB and Mongoose.
- Built secure authentication and authorization systems.
- Integrated third-party APIs (Mapbox, Cloudinary).
- Developed front-end components and user interfaces.
- Implemented server-side rendering and server actions.
